

Sewer Pump Wells

Pump Wells

Rocla® Pump Wells are suitable for housing sewage pumps and associated equipment as well as the storage of sewage and effluent to a depth of up to 8m. The chamber sections are available in effective lengths of 1.22m and 2.44m with a rebated joint section.

Sewer Pump Wells

Nominal Diameter	External Diameter (mm)	Internal Diameter (mm)	Wall Thickness (mm)
1500	1689	1461	114
1650	1854	1638	108
1800	2019	1791	114
1950	2184	1936	124
2100	2336	2066	135
2400	2718	2438	140
2700	2980	2700	140
3000	3310	3000	155

Joining Procedure

Joints of each section should be coated with Rocla® Sewer Access System Primer and should be joined with two strips of Rocla® Sewer Access System Sealing Compound applied to the outside upper rebate as shown. The internal joint gap should be grouted using a suitable cementitious epoxy mortar or a method approved by the regulatory authority.
