

Water Level Controller

for wetlands and ponds

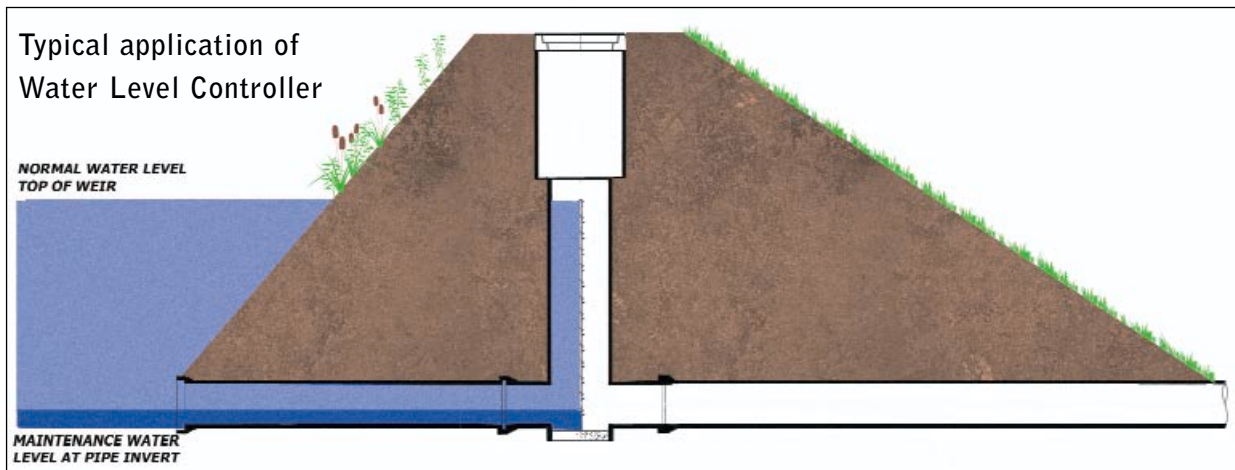

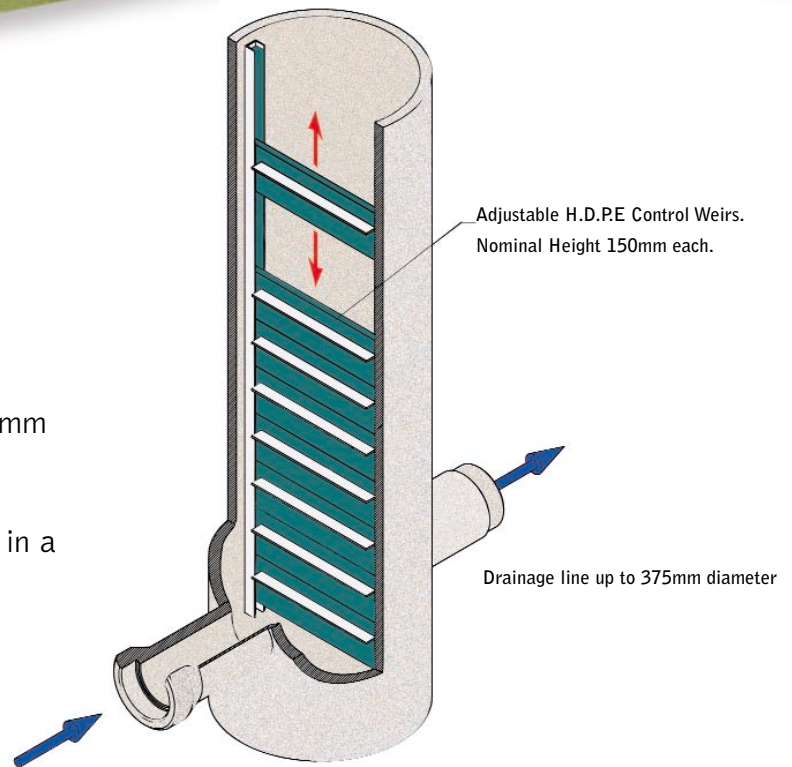

The Rocla® Water Level Controller is used to set the level of water in an upstream wetland or pond.

The easily removed weir sections allow the water level to be adjusted temporarily for maintenance.

Benefits

- Ease of operation
- Simple construction
- Suitable for new or existing systems
- Durable construction
- Controls water levels in increments of 150mm

The Rocla® Water Level Controller is available in a standard 525mm internal diameter shaft, to suit drainage lines up to 375mm diameter.
